

project. The United States, in partnership with Norway, will also provide \$12 million to build a bridge over the river between Afghanistan and Tajikistan, forming a key road link.

- Agricultural projects will include a package of irrigation programs, including \$6 million to assist Afghanistan in managing water systems that are already being repaired under cash-for-work programs and a \$15 million project to restore irrigation systems and other essential services.
- In the area of education, the United States is initiating a \$60 million program to build or repair 1000 schools, print 15 million textbooks, train 30,000 teachers, and offer accelerated learning programs to 60,000 students.
- Health is also a priority sector for U.S. assistance, with \$133 million planned for a three-year program that will construct or rehabilitate 550 primary health care centers, expand access to health services in rural areas, and address the basic health care needs of women and children.

The United States and Afghanistan will work together toward that day when Afghanistan is fully secure and self-sufficient. In Afghanistan as elsewhere, the United States covets no resources and seeks no special advantage. President Bush and President Karzai reaffirm the bond of friendship that unites the peoples of America and Afghanistan in the common pursuit of a safer, freer, and more prosperous world for the benefit of all.

Statement on Proposed Legislation To Implement the Clear Skies Initiative

February 27, 2003

In my State of the Union Address, I urged Congress to enact my aggressive and innovative plan to cut air pollution, the Clear Skies Initiative. Clear Skies will cut powerplant emissions by 70 percent—much further, fast-

er, more cost-effectively and with more certainty than current law.

Today, with the reintroduction of my legislation, Clear Skies takes an important step towards delivering health and environmental benefits to Americans. I am pleased that Chairman Tauzin and Chairman Barton have introduced Clear Skies in the House and Chairman Inhofe and Chairman Voinovich have introduced it in the Senate.

In the last 30 years, America has dramatically improved air quality. Clear Skies is the next step in this positive trend towards bringing cleaner air and better health to more of our citizens. We have learned a lot about what approaches work best, and now is the time to put those lessons to use.

Clear Skies builds on the proven success of our most effective clean air program—the acid rain reduction program, which significantly reduced acid rain in the Northeast. Clear Skies expands this program so that in the next decade alone, we will remove 35 million more tons of pollution from the air than would the current Clean Air Act. This will also help protect our forests, lakes, streams, and coastal waters from acid rain, nitrogen, and mercury degradation. And Clear Skies will do this through the use of a market-based system that guarantees results while keeping electricity prices affordable for Americans.

I thank Chairmen Tauzin, Inhofe, Barton, and Voinovich for their leadership on this important environmental initiative. Clear Skies represents cost-effective pollution reductions that make sense for the environment and the economy. Administrator Whitman and I look forward to working with Congress to deliver the benefits promised by passage of Clear Skies legislation.

Statement Announcing the Hydrogen Powerplant Demonstration Project and the Carbon Sequestration Leadership Forum

February 27, 2003

Today I am pleased to announce that the United States will sponsor a \$1 billion, 10-year demonstration project to create the
